Booth answer key: 30 challenge cases

Keep this sheet behind the table. "Looked in the right place?" compares the AI heatmap with the true tumor outline: Yes = overlap of 0.3 or more, Partly = 0.1 to under 0.3, No = under 0.1, blank = normal tissue (no tumor outline).

These 30 cases were picked to include the AI's mistakes, so it scores lower here (23 of 30) than on the full test set (57 of 68, 84%).
